

DR. OKTA:

YOUR IDENTITY HEALTH SPECIALIST

Paging Dr. Okta - Prescribing Smarter, Safer, and Stronger Identity Environments

Okta is powerful—but even the best platforms need a tune-up now and then. If your identity setup feels sluggish, misaligned, or just not keeping up with your growing needs, it might be time to check in with Dr. Okta.

Offered by the identity experts at Active Cyber, Dr. Okta is a free diagnostic and advisory service built to help you get your environment back in top shape. No waiting room. No unnecessary procedures. Just expert care for your identity stack.

WHAT'S IN THE ASSESSMENT?

1 Full Identity Vital Scan

We examine your security policies, user access controls, governance structure, integrations, and performance. Think of it as a full physical for your Okta instance.

2 A Custom Diagnosis

Get clear, prioritized insights—what's working well, what needs fine-tuning, and where you may be exposed to risk or inefficiency.

3 Your Treatment Plan

Receive a tailored roadmap packed with practical, scalable recommendations. Use it yourself or let our Okta-certified specialists step in and implement.

WHY CHOOSE DR. OKTA?

OKTA-CERTIFIED EXPERTS

Our team has deep experience in optimizing and securing Okta environments across industries.

FRIENDLY, HANDS-ON SUPPORT

We believe in partnership over transactions, always ready to lend a hand.

SECURITY & COMPLIANCE FIRST

We align your identity framework with industry best practices and regulatory standards.

SYMPTOMS WE COMMONLY SEE:

- Outdated or overly permissive access policies
- Delayed user provisioning or deprovisioning
- Siloed identity data across HR, IT, and business systems
- Compliance headaches from unclear governance
- Integration hiccups and security blind spots

WHO SHOULD BOOK A QUICK SYSTEM CHECK-UP?

CISOs, IT directors, IAM leaders, and ops teams looking for a smarter, more strategic approach to Okta. If your system works—but could work better—we're here to help.
