DR. SNOWFLAKE

Diagnose and Optimize Your Snowflake Environment Fast

BECAUSE EVEN YOUR DATA CLOUD DESERVES A WELLNESS CHECK

Snowflake is built for speed, scale, and insight—but even the healthiest platforms can drift and freeze without a little routine care. When performance dips, costs spike, or integrations get messy, it's time to bring in the data doctors.

Dr. Snowflake is Active Cyber's expert-led assessment and optimization service for organizations ready to get more out of their Snowflake investment—like a good doctor's visit: clear answers, expert care, and zero stress.

DATA SYMPTOMS WORTH A LOOK:

1. Queries taking longer than they should
2. Data pipelines clogged or misfiring
3. Inconsistent user roles or access controls
4. Poor visibility across integrations
5. Higher-than-expected spend (with no added value)

WHY DR. SNOWFLAKE'S THE RIGHT CALL

Real Snowflake Pros – Certified, experienced, and deeply technical

Cost-Aware Optimizations – No unnecessary spend, just efficient design

Security You Can Trust – Governance and compliance are part of the plan

End-to-End Guidance – From ingestion to analytics, we've got you covered

We Diagnose, Explain, And Treat - No pressure, no upsell

YOUR DATA HEALTH PLAN:

Book a Free Check-Up
Our certified Snowflake experts assess your setup—query structure, security, usage patterns, and more.

Get Your Diagnosis + Treatment Plan
You'll receive a tailored roadmap with optimization strategies based on your goals, usage, and growth plans.

Start Healing (Your Way)
Whether you want us to implement changes or handle it in-house, you'll be equipped with what you need to move forward—confidently.
